Commenting on the results, Mr. Phani Tangirala, Managing Director & CEO, Expleo Solutions Limited, said: "We delivered a strong quarter, recording year-on-year total revenue growth of 11.2% despite challenging market conditions, particularly in Europe, where we have a significant presence. We continue to remain optimistic about the growth opportunities in the North America and Middle East markets and expect their growth momentum to continue.

Operationally, we delivered a strong performance in this quarter, with consistent improvement across all metrics. Digital services continued to grow, supported by accelerating AI monetization. Utilization remained at optimal levels, project SLAs were consistently met, attrition moderated, and cash generation from operations increased significantly. The AI training initiative launched last quarter has begun to show encouraging results, driving measurable improvements in operational efficiency across multiple teams.

Our continued investments in Artificial Intelligence and Digital Transformation are translating into revenue traction, with AI and AI-enabled services creating scalable growth opportunities across the portfolio. We expect this momentum to strengthen, as these capabilities evolve into durable competitive advantages that enhance differentiation, deepen client relevance, and expand long-term value creation.

Looking ahead, our priorities remain firmly aligned on disciplined execution driving profitable growth through focused initiatives, advancing operational excellence, and selectively capitalizing on emerging opportunities to deliver sustainable returns for all stakeholders."
